

# Moving home?

*Sorting the suppliers and  
simplifying the admin when you move home*

★ Trustpilot

Legal for Landlords™

Talking property, making sense.

# We expect you've got a long list of things to sort out.

You're probably wondering if you can manage it all. Well, don't panic because Homeshift can make things simpler.

Homeshift is a service that allows tenants to arrange the set-up and management of key household services in just a few minutes. Everything's done online – including finding some of the best possible deals.

Imagine – your gas, electricity, council tax, water, broadband and media services all sorted, and all in one place. One friendly supplier with a dedicated point of contact and the option of webchat. Doesn't that sound better than waiting in all those different call queues, repeating your details time after time?

## Homeshift makes **Sense**

It helps to take the stress out of renting, lightens the load when you're moving and saves you money along the way.

## Homeshift is **Simple**

We offer one tariff per service. There's no confusion with different rates, extras and charges. You know exactly what you're getting because it's clear and simple.

## Homeshift is **Flexible**

We don't tie customers into long-term deals. You can pick a month-on-month rolling contract and if you want to move on, that's fine. Unlike some suppliers who have their customers locked in, our customers are loyal because of our great service.

## Homeshift is **Great Value**

For energy, we beat around 80% of the market. Our internet deals are excellent value too. Other organisations need to cover the extra expense of aggregators, but because we don't have that burden, you get a great price which we can fix for the duration of your tenancy.
